

Sprint 4

Date : 16 Nov 2022

Project Name : Early Detection of Chronic Kidney Disease Using Machine Learning

Team ID : PNT2022TMID20701

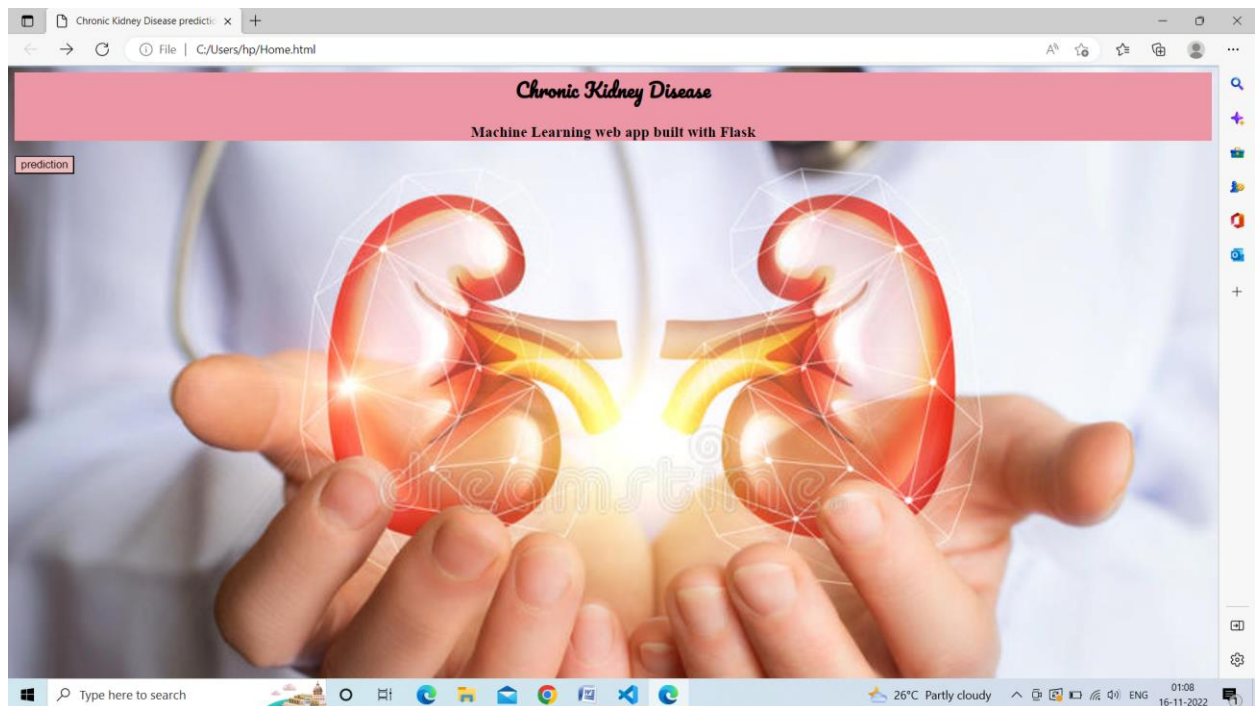

Team Lead : Swetha.S

Team Members : AnuNandhini J, Ramya R, Subashini T

Screenshots:

After Testing the Application

Home Page:

On clicking the prediction button, A new page i.e prediction page is opened.

Prediction Page:

Early Detection Of Chronic Kidney Disease
A Machine learning web app built with flask
Please fill in this form to predict the disease

Blood Urea:
Enter Blood Urea value

Blood Glucose Random: Enter Blood Glucose Ra

Coronary Artery Disease:
Yes

Anemia:
Yes

Puscell:
Normal

Red Blood Cells:
Normal

DiabetesMellitus:
Yes

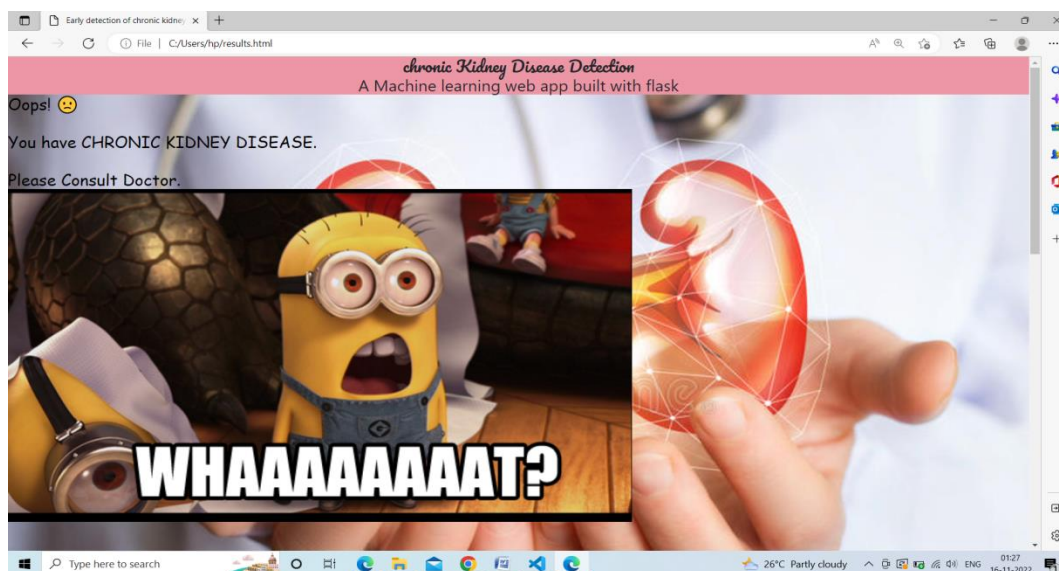

PedalEdema:
Yes

prediction

After filling the form enter prediction, result will predicted and shown to the user.

Result page:

If the user is affected the following page will be displayed.

If the user is not affected, the following page will be displayed.
