

Sprint 3

Date : 16 Nov 2022

Project Name : Early Detection of Chronic Kidney Disease Using Machine Learning

Team ID : PNT2022TMID20701

Team Lead : Swetha.S

Team Members : AnuNandhini J, Ramya R, Subashini T

Screenshots

Prediction Page:

Early Detection Of Chronic Kidney Disease
A Machine learning web app built with flask
Please fill in this form to predict the disease

Blood Urea:
Enter Blood Urea value

Blood Glucose Random: Enter Blood Glucose Ra

Coronary Artery Disease:
Yes

Anemia:
Yes

Puscell:
Normal

Red Blood Cells:
Normal

DiabetesMellitus:
Yes

PedalEdema:
Yes

prediction

In this page, the inputs or the user data is obtained for the prediction process. By evaluating using the obtained data results are predicted.
