EMPATHY MAP

Date   :   13 Nov 2022

Project Name : Early Detection Of Chronic Kidney Disease Using Machine Learning

Team ID   :   PNT2022TMID20701

Team Lead   :   Swetha.S

Team Members :   AnuNandhini J, Ramya R, Subashini T

Think and feel?

Exploring Data Analysis

Data Preprocessing

Model Building

Vomiting and muscle cramps?

High Medical Bills

Trouble sleeping, shortness of birth?

Positive and Negative results

Hear?

See?

Itchy skin, High blood pressure

which hospital is best for curing kidney disease?

To get basic knowledge about kidney disease

Patients should follow healthy food diets and exercise

what if something bad happens?

Say and do?

Pain

Right decision should be taken

Thinking about family, without family and friends

Gain

Can Get the right teatment at the right time

Early detection leads to easy cure of disease

Increases the chance of living happily !
